

FLEXANTENNA - HALO

SUPERIOR SCANNING

FLEXANTENNA offers best-in-class tag read performance across tag orientations. Focused linear antennas reduce cross reads and blind spots. Install individual units or combine multiple units as needed.

FLEXIBLE INSTALLATION

Floor mount and stack to cover dock doors. Hang above doorways and workstations. Pole mount to form conveyor tunnels. Flush mount to walls and ceilings to maximize space. Attach to AGVs and vehicles to read on-the-go.

EASE OF DEPLOYMENT

With rising costs of shipping and labor, FLEXANTENNA is a clear winner with reduced costs to transport, deploy, and support. The modular design reduces size and weight allowing for standard parcel shipments and single person installation.

HALO KIT CONTENTS:

- QTY 5 – 60” Segment 1 1/4” Conduit
- QTY 2 – 30” Segment 1 1/4” Conduit
- QTY 2 – 90° Elbow 1 1/4” Conduit
- QTY 6 – Compression Coupling 1 1/4” Conduit
- QTY 2 – Compression Connector 1 1/4” Conduit

SPECIFICATIONS:

WEIGHT: 38 lb. total weight
